DIGITAL SIGNAGE

POWER YOUR BUSINESS!

INTERACTIVE MIRROR SCREENS
BECOMING MORE AND MORE POPULAR

While revenues in classic media like daily newspaper, popular magazines and cinemas are decreasing, digital revenues on television, outdoor and radio is growing. According to PwC, the digital revenue with out-of-home advertising in Germany will continuously grow from 164 millions EUR in 2017 up to 483 millions EUR in 2022. (Source: PwC, October 2018)

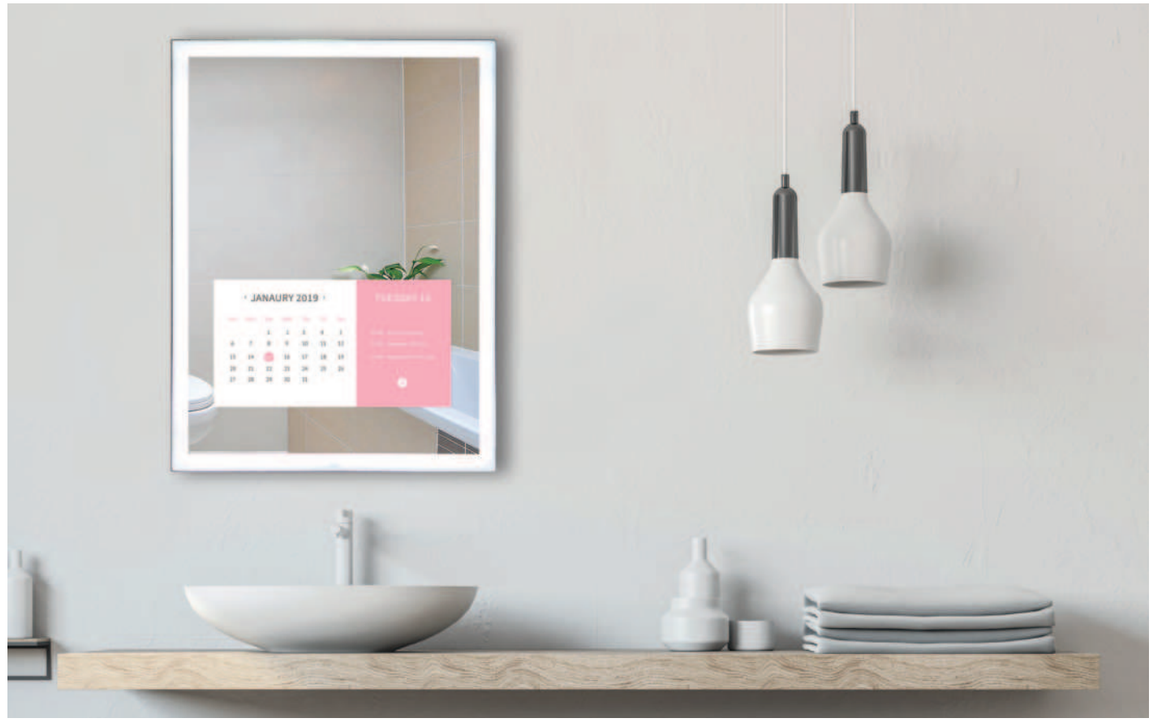

Digital revenues from outdoor advertising in Germany in the years 2012 to 2022
(millions EUR)

The technologies enable increased consumer interaction. There is no limitation to only show content. With modern touch technologies the user can interact with the signage screen to get extended information. Former PowerPoint-focused meetings can become collaborative events. Simply use the large monitor as digital whiteboard and immediately store the meeting results on your server. No loss of flipchart or manual whiteboard content in the future.

Endrich is your hardware provider for multiple solutions. The portfolio ranges from smart mirrors integrating touch screens, digital poster stands, touch kiosks and bar type monitors. Also, we have the largest capacitive touch monitor available on the market – perfect for conference or class rooms.

INTERACTIVE MIRROR SCREENS
ONE MIRROR, MULTIPLE FUNCTIONS – MULTIMEDIA ENTERTAINMENT IN ONE TOUCH

- Mirror with integrated touch PC
- Google Play Store for unlimited App extensions
- Integrated camera optional
- Surrounding LED bar
- Invisible display when switched off
